---

### Experience

---

#### Central Oregon Truck Company / Web Developer

FEBRUARY 2018 - PRESENT, REDMOND

Developed and maintained online employee web portal for communication and data presentation. Revitalized cross platform mobile app used for employee communication and document scanning, saving office staff 40+ hours of indexing and thousands of dollars per month.

#### Intel Corporation / Software Developer

JUNE 2016 - DECEMBER 2016, HILLSBORO

Collaborated on a six-member team to optimize Windows automation tests that evaluated hardware and operating system health resulting in greater efficiency and error detection. Constructed an automated service on a Raspberry Pi that submits automation requests which result in saving engineering team 30 minutes per day.

#### Air-Weigh / Mobile Developer

MARCH 2015 - SEPTEMBER 2015, EUGENE

Innovated new effective mobile application and Bluetooth chip product resulting in much simpler user control, and decreasing setup time by more than 75 percent. Collaborated with engineer to create fast and efficient method of wireless communication over Bluetooth Low Energy.

---

### Education

---

#### Oregon State University / Computer Science

2013 - 2017, CORVALLIS

Bachelor's of Science in computer science

ABET accredited Computer Systems option

3.66/4.0 GPA
